**We have been
operating in
opportunistic
manner**

Environment

Most of the tools didn't have an ability to track historical changes and poor integrity between different services.

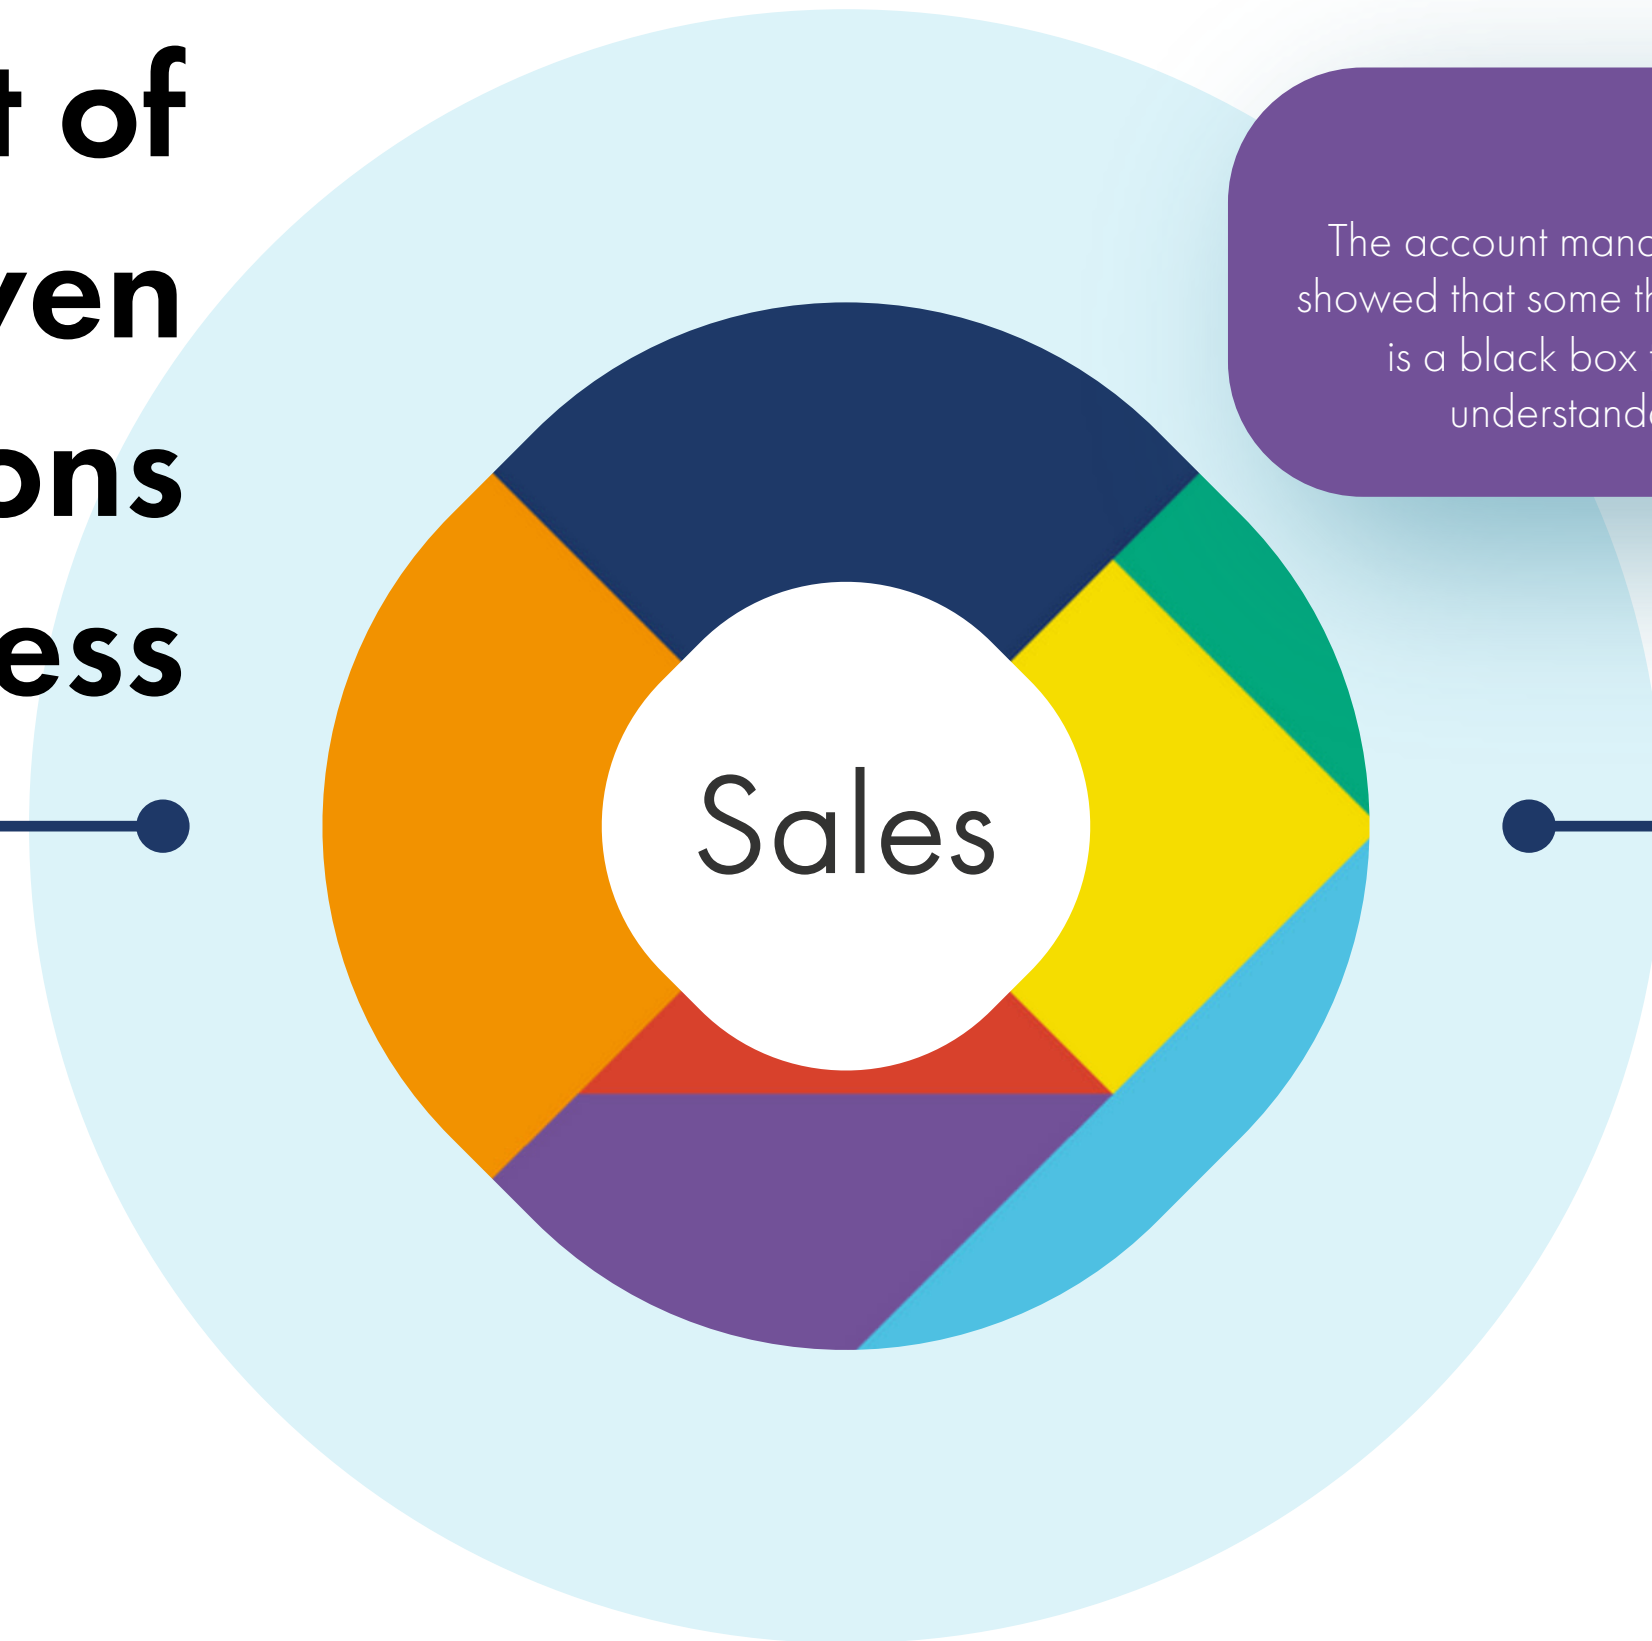

Research

To concretize an effectiveness of a staffing function were performed several independent researches.

The deficit of data-driven decisions affects business

Request

Several accounts requested a research for upcoming client staffing requests to make an accurate estimates.

Survey

The account management survey showed that some think recruitment is a black box to them without understandable measures.

1 of 9

candidates DataArt hires which cost \$2,400 per hire in 2018 and only 19% of the respondents knew that.

Collaboration

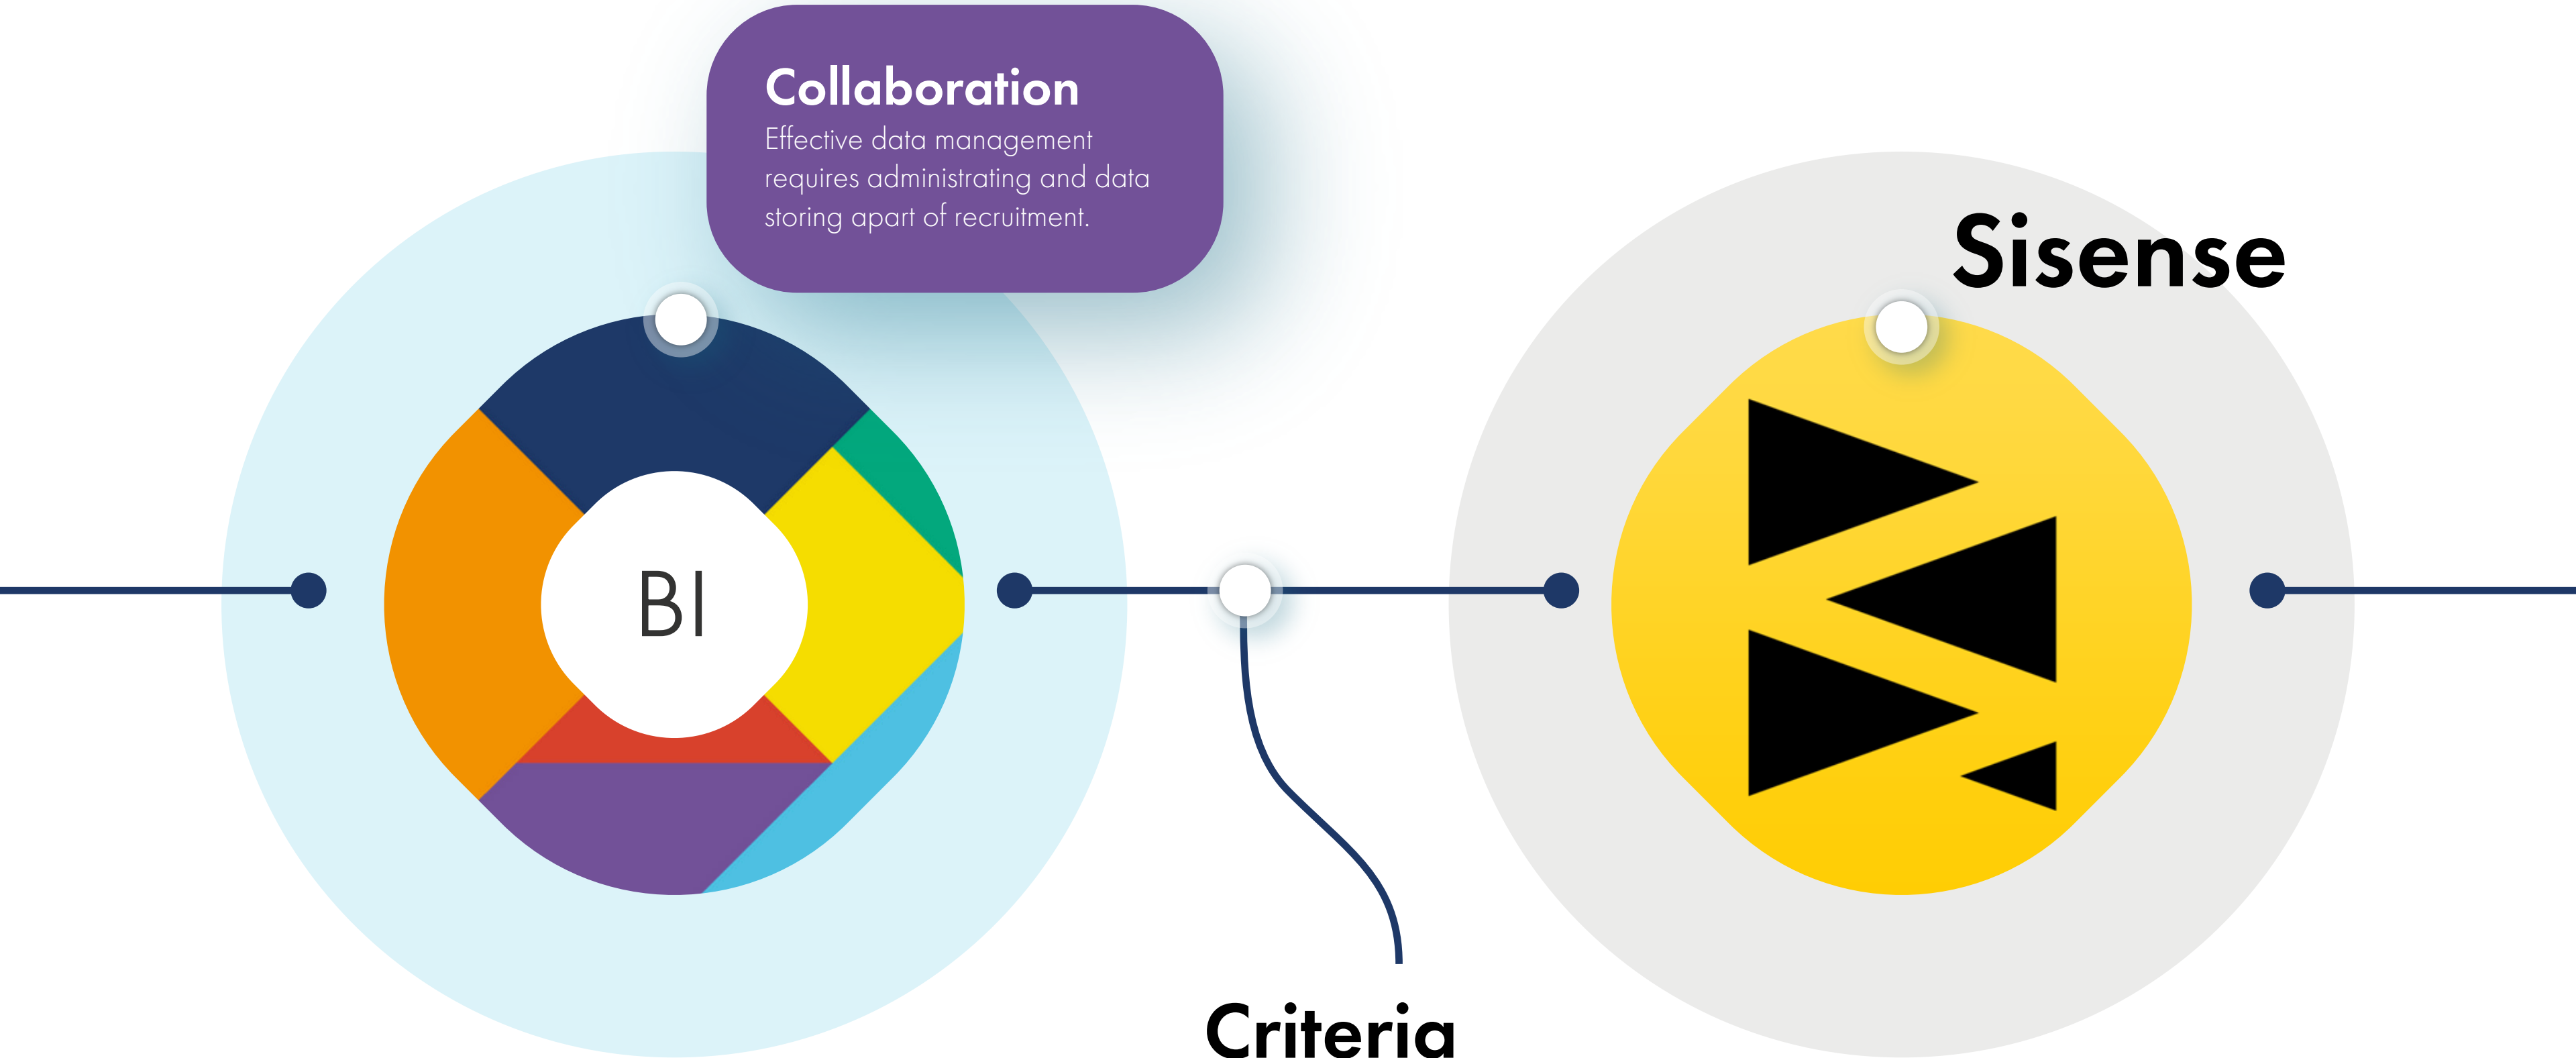

Effective data management requires administrating and data storing apart of recruitment.

BI

Sisense

Criteria

Chosen storage should be based equally on system integration, security, and customization.

Integration

In our case, there were more than 3 data sources that are constantly being used in daily operations and might be considered sufficient.

Everyone's an expert

When there is no unified data source, everyone used to their own experience and they might think that numbers are not valid enough.

Validation

Data validation is a constant process and you'll probably face different data inaccuracies, so it is necessary to plan notes release.

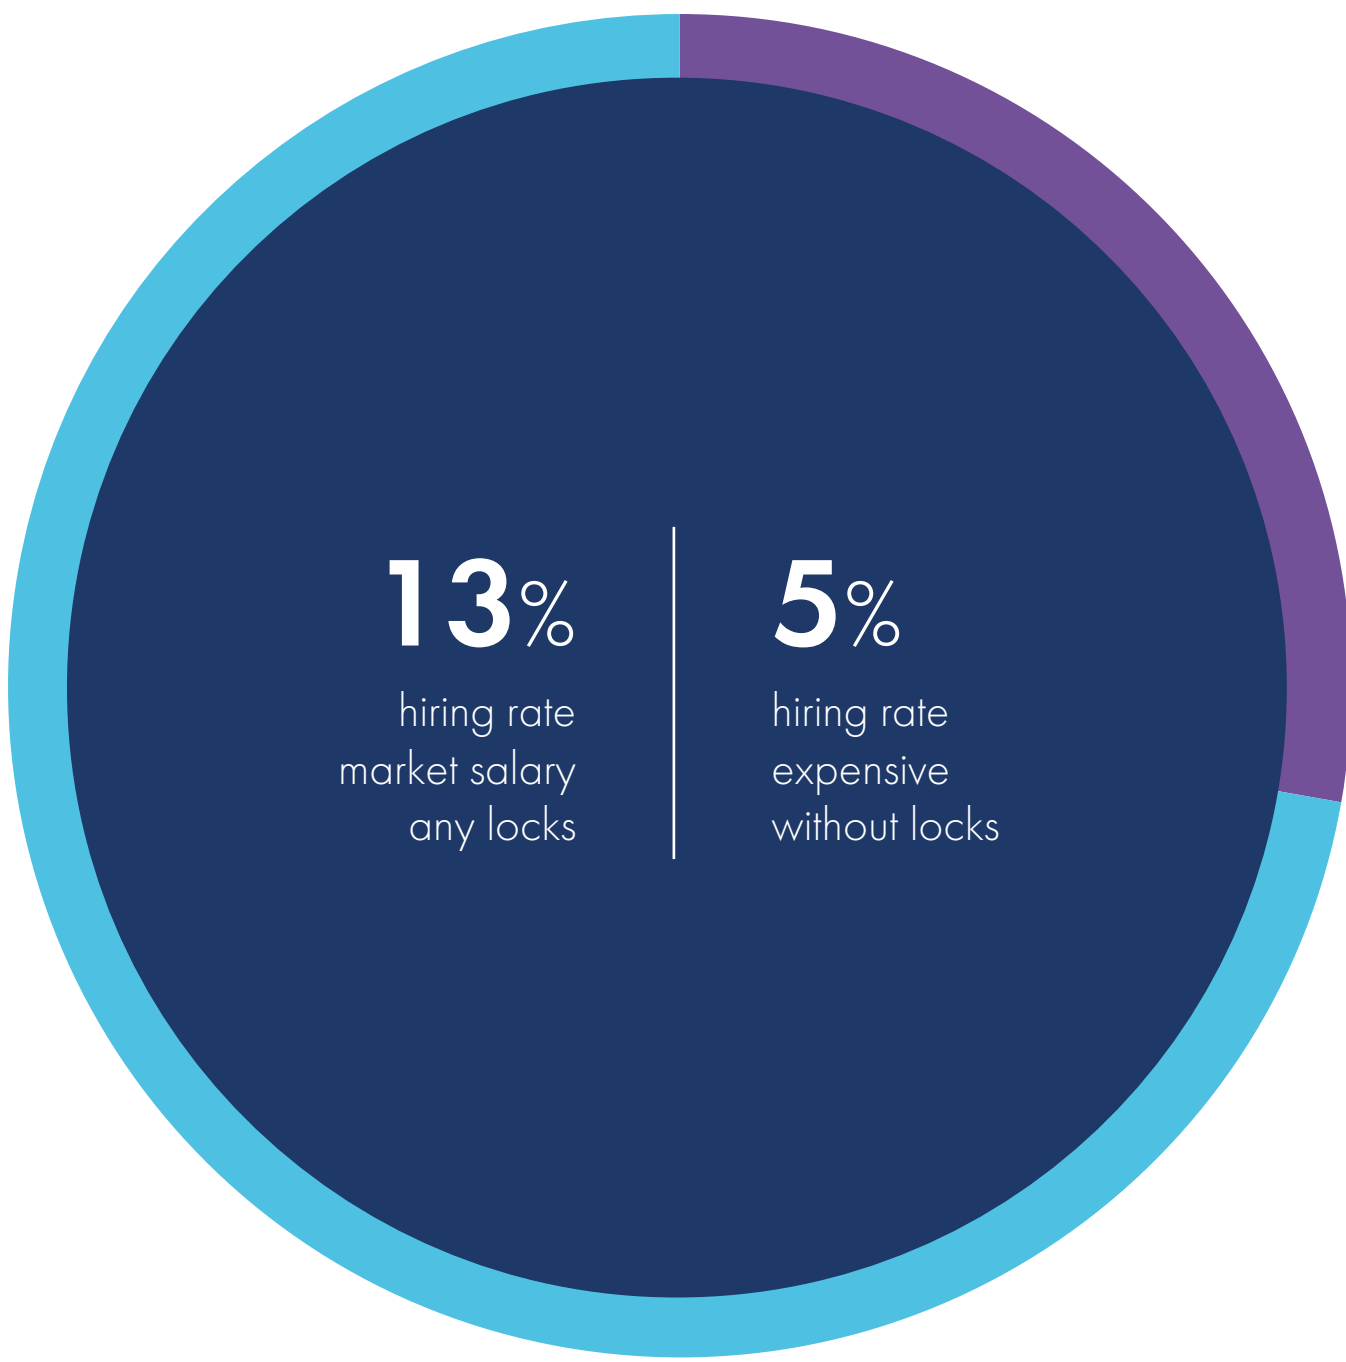

Terms

Even after implementation data, users can talk about different languages and so you should define all terms and conditions used by the data board.

FAILED

Hiring rate comparison

between market level and expensive candidates in 2018-19

Qualification comparison

between expensive candidates without locks in 2018-19

Qualification comparison shows that most of the candidates are Middle level, fewer candidates have shown the Senior level. Those who were estimated as Strong Middle and Strong Junior level likely applied to Senior and Middle positions but didn't succeed. Though optimization steps should emphasize on Senior and Middle levels.

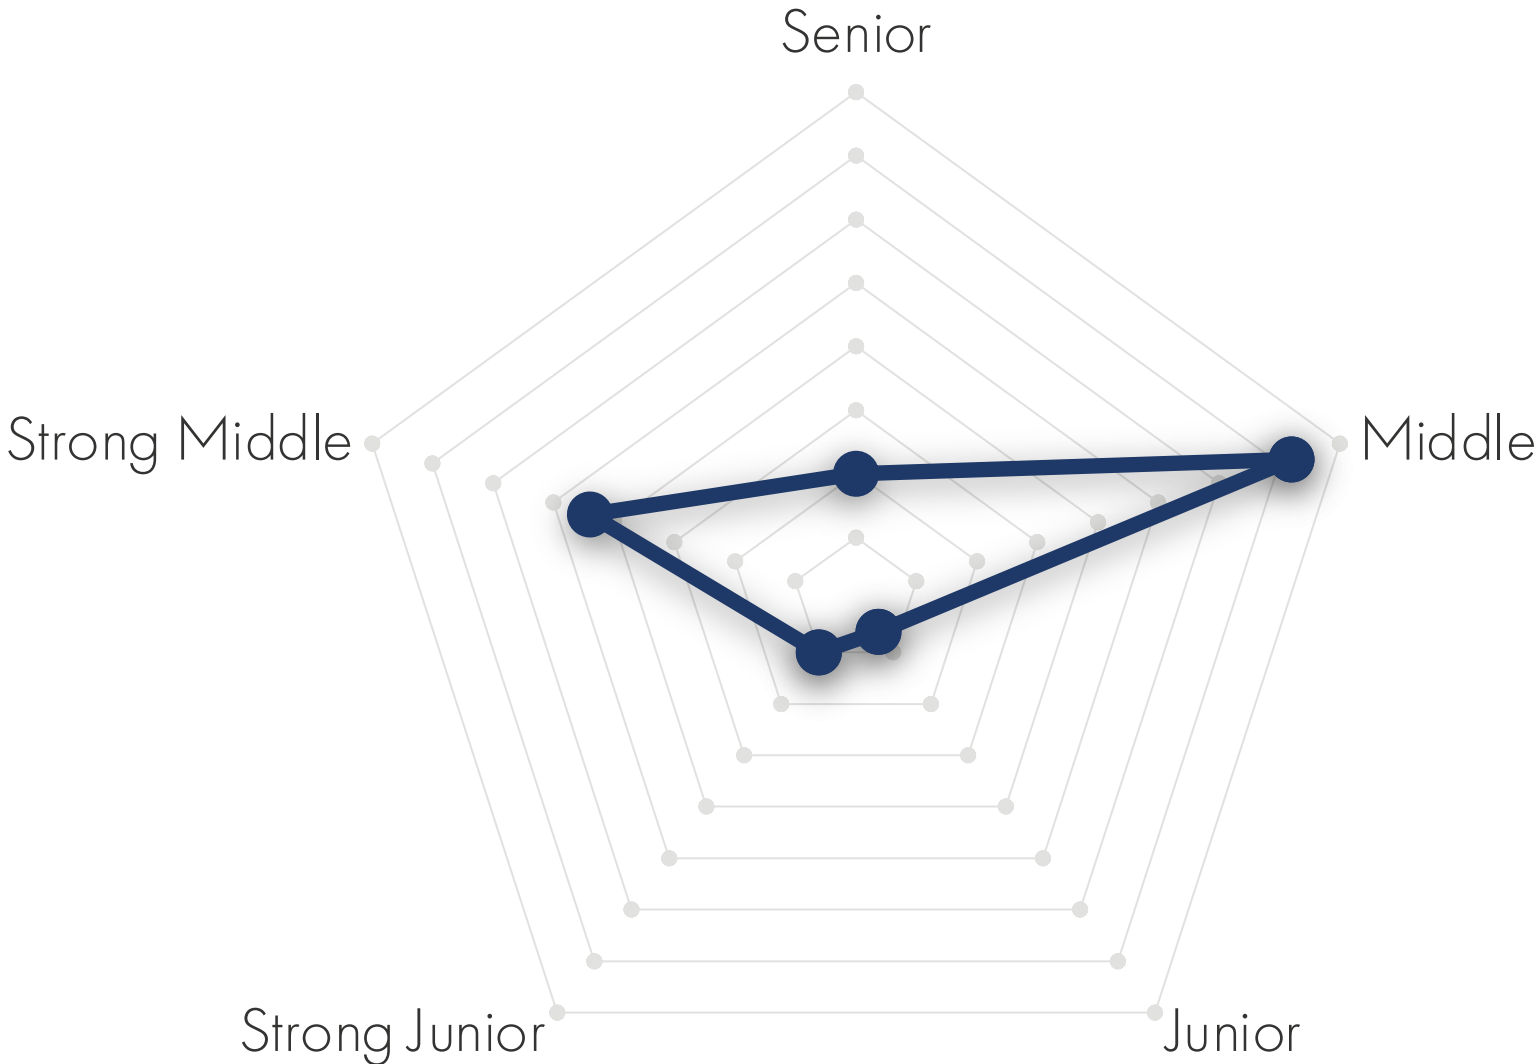

Hiring rate comparison

between expensive candidates without locks in 2018-19

Although hiring rate for all levels are lower than the one with market expectations, Middle candidates represent a significant absolute value to reject from. Therefore before scheduling an screening process recruiters should exclude Senior and Strong Middle candidates without interest from projects as well as expensive Juniors. With staffing demand remaining expensive Middle candidates should be processed as before.

Hiring rate comparison

between expensive senior candidates in 2018-20
